# WHY WE ARE MARCHING

In Turkey today 100,000 people are cruelly imprisoned by the fascist junta; 4 people have already been executed. Torture is generally used — against trade unionists, democrats and revolutionaries — against anyone opposing the generals' fascist rule. "18 people... have died in custody since the military takeover" (*Amnesty International*). Numbers killed continues to grow — the generals' "shoot the kill" martial law is the cause: on average, 10 people are killed by security forces every week.

In Kurdistan it is even worse — fascism commits genocide against the Kurds.

Parliament has been abolished; all political parties are banned.

Turkey's economy continues in permanent crisis — inflation over 100% and a quarter of the workforce unemployed.

Fascism is trying to solve the problems by smashing the working class movement. DISK trade union confederation is under heavy attack — 2000 key officials and active members are coming to trial soon — the first batch of prisoners at the end of March.
